4 DOCTOR CONFIRMATION

CONFIRMED BY
Dr Zara Example - Paediatric neurologist

HOW IT WAS CONFIRMED
Family's email invitation; reviewed in Donni

PRACTICE
Example Children's Clinic, Melbourne VIC

REGISTRATION (AHPRA)
MED0001234567

AHPRA REGISTRATION CHECK
Found and current on the register - checked 12 Oct 2026

DOCTOR'S CONFIRMATION
The medicines marked Confirmed match my current prescribing (statement below)

Statement: "I confirm the items I marked Confirm above accurately reflect my current prescribing for Henry Sample as at 12 October 2026. This is not a prescription. It is a confirmation for the Donni app only. A pharmacist cannot dispense any medication based on it."

If a medicine is added, removed or changed, it shows as Waiting for review or Changed since confirmed until a doctor confirms it again. This confirmation is reviewed after 6 months.

Record: chart version 1869b438d76e · contact used zara.example@example-clinic.test · statement version 3 · times in Australia/Melbourne.

Donni records medicines as listed by the family and confirmed by their treating doctor. It does not prescribe or give medical advice.

Example only: every name, number, medicine and date on this document is made up.

How to read the certificate

The same certificate as page 1.
Each number explains one part.

1 Certificate number and issue date. A reference only: quote it if you contact us. It is never part of a link.

2 The patient as the family entered them. Please check the name and date of birth match your records.

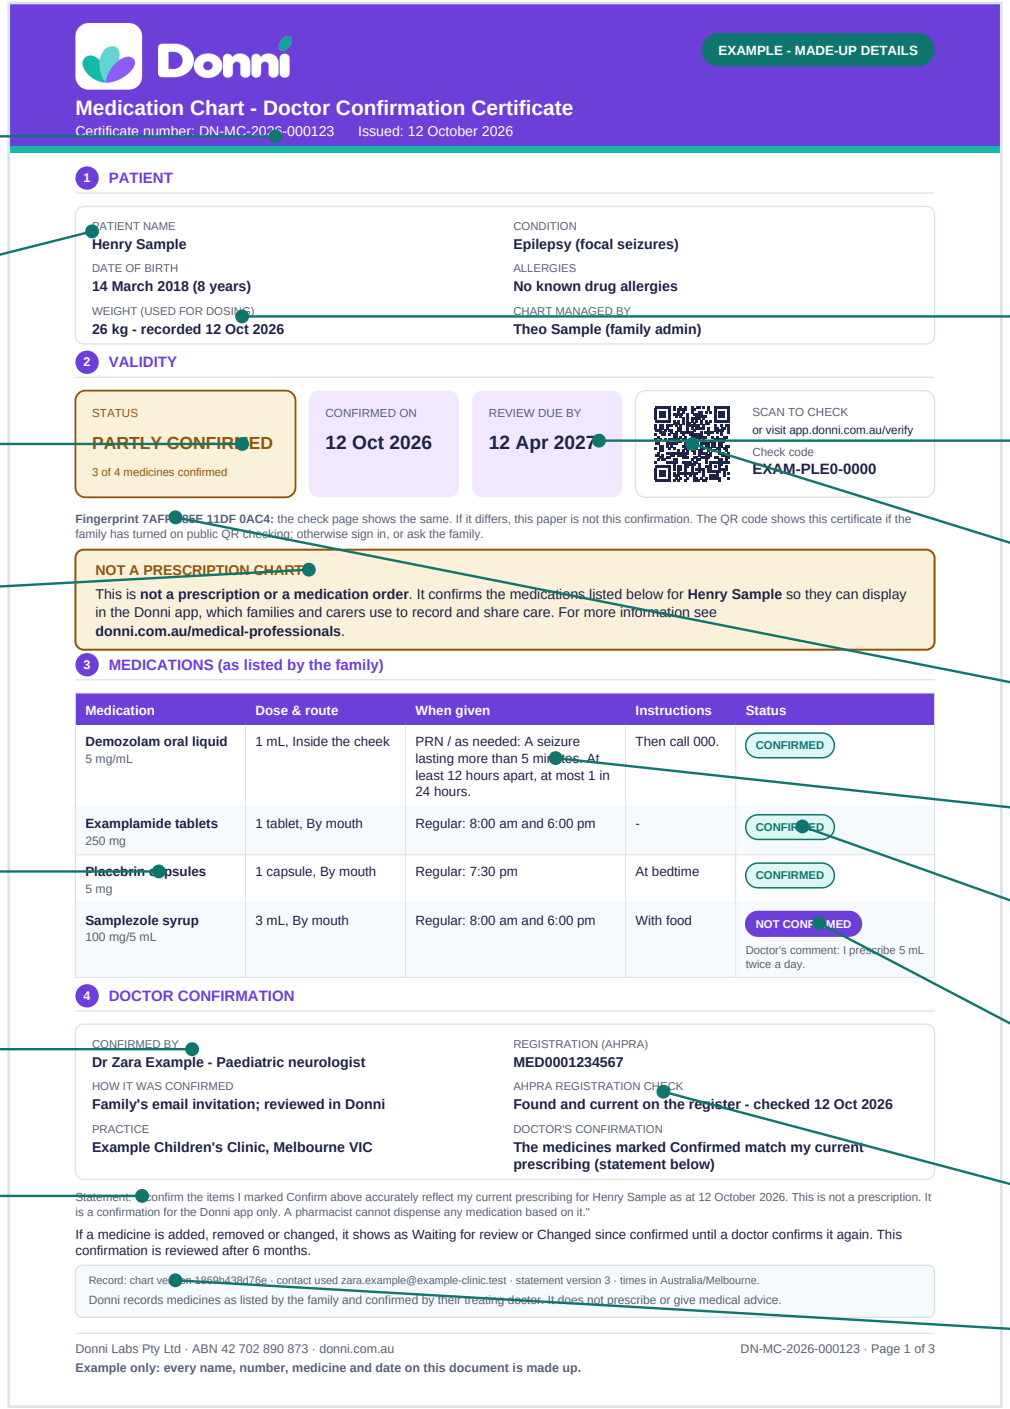

3 Overall status. Here it is Partly confirmed, because one medicine was not confirmed. It can also be Confirmed (every medicine), Not confirmed yet, or Superseded.

4 On every certificate and cannot be removed: this is not a prescription. A pharmacist cannot dispense from it.

5 Each medicine exactly as the family entered it: name, strength, dose and route on the issue date. Confirmed medicines are listed first.

6 Your name, profession, specialty and AHPRA number, as you entered them on the review screen.

7 The statement you ticked before submitting, word for word.

DOCTOR'S CONFIRMATION
The medicines marked Confirmed match my current prescribing (statement below)

Statement: "I confirm the items I marked Confirm above accurately reflect my current prescribing for Henry Sample as at 12 October 2026. This is not a prescription. It is a confirmation for the Donni app only. A pharmacist cannot dispense any medication based on it."

If a medicine is added, removed or changed, it shows as Waiting for review or Changed since confirmed until a doctor confirms it again. This confirmation is reviewed after 6 months.

Record: chart version 1869b438d76e · contact used zara.example@example-clinic.test · statement version 3 · times in Australia/Melbourne.
Donni records medicines as listed by the family and confirmed by their treating doctor. It does not prescribe or give medical advice.

Donni Labs Pty Ltd · ABN 42 702 890 873 · donni.com.au DN-MC-2026-000123 · Page 1 of 3

Example only: every name, number, medicine and date on this document is made up.

8 Weight used for dosing, with the date it was recorded. Worth a quick check.

9 Confirmed on, and review due 6 months later. After that each medicine shows Review due.

10 Scan to check: opens the live check page. Or type the check code at app.donni.com.au/verify.

11 The fingerprint is printed here and on the check page. If they differ, this paper is not this confirmation.

12 As-needed (PRN) medicines show the trigger, the minimum gap and the most in 24 hours.

13 Each medicine has its own status. Page 3 shows all five and their colours.

14 A medicine you did not confirm shows Not confirmed, with your reason under it. It stays that way until the family corrects it and a doctor reviews it again.

15 Donni Labs checks your registration on the AHPRA register by hand. The result and date are shown.

16 The record: chart version, the contact used and the time zone, so the confirmation can be traced.

Donni

Submit my decisions

STATUS KEY

Status	What it means	What happens next
CONFIRMED	A doctor confirmed this medicine as the family listed it.	Stays confirmed until its review date, unless it is changed.
WAITING FOR REVIEW	The family added it, or its confirmation was withdrawn, and no doctor has reviewed it yet.	A doctor reviews it, then confirms it or not.
CHANGED SINCE CONFIRMED	The dose, times or instructions were edited after a doctor confirmed it.	Not confirmed until a doctor confirms it again.
NOT CONFIRMED	The doctor did not confirm it. Their comment is kept on the medicine.	Stays not confirmed until it is corrected and a doctor reviews it again.
REVIEW DUE	The review period has passed.	A doctor needs to confirm it again.

Your decision on each medicine: **Confirm** marks it Confirmed. **Do not confirm** marks it Not confirmed and keeps your reason on the medicine. **Not my prescribing** leaves its status as it is, so the family can ask the right prescriber. Colours never use red, which Donni keeps for emergencies.

Example only: every name, number, medicine and date on this document is made up.
